

TRANSition Pathways and RISK Analysis for Climate Change Mitigation and **Adaptation Strategies**

TRANSrisk is an exciting EU Horizon 2020 project studying the risks and uncertainties that lie ahead as we transition to a low carbon world. Our work examines the technical, economic and social feasibility of potential low carbon transition pathways. The project's outputs will help countries develop NDCs that complement socio-economic goals and assess risks and uncertainties associated with their potential pathways.

TRANSrisk Policy Lunch "Paris in Practice: Understanding the Risks and Uncertainties"

Date: Tuesday, 06 Nov 2018

Venue: SQUARE convention centre, Brussels, Belgium

In the view of TRANSrisk's finalisation, the project's results and policy recommendations will be presented. Our results will help inform more effective climate change policy with help of a better understanding of the risks and uncertainties this transition entails.

This event will explore how the EU countries can make the transition towards zero or even negative emissions, as envisaged by 2015's Paris Agreement. New tools and techniques that can help develop robust and effective climate policy will be presented.

Please RSVP with your name, position and organisation transrisk@sussex.ac.uk.

The agenda is available online here.
